Bethel High School Body Temperature Record Sheet

- 1. Every day before school, the parents / guardians should have a body temperature check for their child. If your child is found to have caught a fever (For normal body temperature range, please refer to the body temperature guideline, i.e.: 37.5°C or 99.5°F higher if using a mouth probe), you should go to the doctor at once, take leave of absence from the school, and stay home to rest.
- 2. After taking record of their child's body temperature, the parents / guardians should add their signature of approval, and then the student should bring the sheet back to the class teacher to check.
- 3. During holidays, the parents / guardians should still fill in the "body temperature record sheet".
