The school premise (including the air-conditioners and air-conditioner filters in all the classrooms and special rooms) has been cleaned and disinfected thoroughly during the class suspension period. Alcohol-based hand dispensers have been installed in every classroom and also on each floor to enhance the measures for disease prevention. All students, parents, visitors, teachers and staff will be requested to check their body temperature at the school entrance. If they have a fever or any respiratory symptoms, they must not enter the school premise.

7. **Reminders for students when entering the school premise**

Students should wear proper summer school uniform to attend classes. Parents should check their children's body temperature before going to school and the temperature record sheets (refer to appendix) should be signed and returned to the school. Students should return home if they have a fever, any respiratory symptoms or if they are feeling unwell. Students should stay in the medical room until they are picked up by their parents. In addition, students should go back to their own classrooms immediately after entering the school premise and please note that no assemblies will be held in playground or school hall.

8. **Anti-Epidemic Measures of students**

Students should maintain good personal hygiene and stay vigilant at all times since it is still too early to say that the epidemic is under control. Therefore, parents should pay attention to the latest information disseminated on the EDB and school website.

Home-school cooperation is of paramount importance to foster a safe and clean learning environment for each student. Hence, please implement the following:
